01 / POSITIONING

Hands-on with hardware. Grounded in IT systems. Built for practical troubleshooting.

Early-career IT candidate with independent experience assembling, upgrading and diagnosing desktop computers and consumer electronics. Supported by Algonquin College coursework in PC hardware, Windows desktop support, GNU/Linux, networking, programming, databases and IT service management; currently pursuing undergraduate studies at Carleton University.

02 / CORE CAPABILITIES

HANDS-ON + FORMAL COURSEWORK

Hardware & diagnostics 01

Desktop PC assembly, component selection and upgrades; CPU, GPU, RAM, storage, cooling, POST and boot troubleshooting.

Windows & user support 02

Windows 10/11, drivers, installation and recovery concepts; device configuration, peripherals and systematic issue isolation.

Networking & Linux 03

TCP/IP, IPv4, DNS, DHCP, routing/switching fundamentals; GNU/Linux command line, file operations and permissions.

Programming & data 04

Introductory programming logic, functions and debugging; relational databases, SQL concepts and IT service-management foundations.

MD FAIYAZ HOSSAIN

BUILD. DIAGNOSE. IMPROVE.

Selected work and studies, presented with clear distinction between independent hands-on activity and academic exposure.

PROJECT 01 / INDEPENDENT, HANDS-ON

Custom desktop PC builds & upgrades

Built, customized and maintained desktop PCs for personal use, working through component compatibility, installation, graphics, storage, power and cooling.

- Selected and installed internal components and peripherals.
- Investigated boot, display, driver and system-stability problems.
- Researched specifications and upgrade paths to resolve compatibility needs.

PROJECT 02 / INDEPENDENT, HANDS-ON

Electronics & device troubleshooting

Explored diagnostics and repair of computers and other consumer devices, using observation, fault isolation and component checks to narrow down technical issues.

- Investigated startup, connectivity and peripheral problems.
- Applied a methodical check-test-recheck troubleshooting process.

PROJECT 03 / ALGONQUIN COURSEWORK

PC support & operating-system labs

Technical study in PC System Technology, PC Troubleshooting, Windows Desktop Support and GNU/Linux system/server support.

- Practiced foundational reasoning for system setup, drivers and desktop support.
- Studied command-line tools, account permissions and OS administration concepts.

01 / OBSERVE	02 / ISOLATE	03 / VERIFY	04 / RECORD
Reproduce the problem	Check likely causes	Test the fix	Capture findings

SYSTEMS & SOFTWARE.

Network thinking · operating systems · programming logic · academic background

CAPABILITIES / STUDIED & APPLIED

A / NETWORKING & CONNECTIVITY

Network fundamentals

Coursework involving networking fundamentals and routing/switching: TCP/IP, addressing, subnetting concepts, connectivity testing and introductory network infrastructure.

`IPv4` `TCP/IP` `DNS` `DHCP` `Cisco concepts`

B / OPERATING SYSTEMS

Windows & GNU/Linux

Studies in Windows desktop support and Linux system/server administration, covering installation, troubleshooting, system configuration and operating-system fundamentals.

`Windows 10/11` `Linux CLI` `File permissions` `Drivers`

C / PROGRAMMING & DATA

Problem-solving through code

Computer Programming studies in core constructs - variables, conditions, loops, functions and debugging - with coursework in databases, relational data and introductory SQL.

`Programming logic` `Debugging` `SQL fundamentals` `Relational data`

D / SERVICE MINDSET

Practical, patient, documentation-aware

Familiar with incident-diagnosis and IT service-management fundamentals. Brings hands-on installation, reliability and communication experience from non-IT working environments.

CURRENT DIRECTION

Seeking an opportunity in **hardware support, computer repair, desktop support or junior IT operations**, where technical curiosity and careful troubleshooting translate into dependable results.

EDUCATION

Carleton University

Undergraduate studies: Cognitive Science
Ottawa, Ontario · Current

Algonquin College

Computer Systems Technician – Networking
Computer Programming coursework
Ottawa, Ontario · 2020–2024

Selected courses: PC System Technology, PC Troubleshooting, Windows Desktop Support, GNU/Linux System Support, GNU/Linux Server Administration, Networking Fundamentals, Routing & Switching Fundamentals, Database Management & Interfacing, Foundation of IT Service Management.

OTHER EXPERIENCE

Amazon Canada

Warehouse Associate · Ottawa
Worked in a device-enabled, process-driven environment and coordinated with a team.

Prime Fencing

Field installation · Ottawa
Hands-on equipment work, measurements, installation and team coordination.
